

Anglian Water Business contracted 24 Ltd to design, supply and install to their new office in Western House. Working closely with the client to give them their own individual office from the Anglian Water Group. We then relocated 130 of their staff to the new building once complete. Contract Value : £750,000.00

24 worked with the in-house team at Anglian Water Business to develop the package to accommodate the needs of a business that was breaking off in its own right, with a vast growth plan. Bringing in design, and comfort into a high density Agile office.

This led to projects in other offices for Anglian Water Business in Edinburgh and Huntingdon, as well as further churn projects in the new HQ.
